

Muhammad Izmir Farhan Bin Kamal

IT Technical Support / Full-Stack Developer

Summary

Hello I'm Izmir Farhan Bachelor's Degree in Computer Science Motivated graduate eager to learn and grow as a programmer, with hands-on experience in automation, web development, and POS systems. Passionate about building practical solutions and contributing to dynamic tech projects.

Experience

DG Sailor Sdn Bhd

Mar 2025 - March 2026

- Developed an automated location finder using Google Maps API, Google Sheets, and JavaScript/HTML to identify potential client restaurants, enabling real-time appointment updates and streamlining prospecting workflows.
- Built FoodieTechBot in Python with Pandas to automate menu data entry, eliminating manual work and reducing errors across company operations.
- Created an issue tracking system using Node.js, React.js, JavaScript, HTML, and CSS, allowing management to monitor, review, and reference technical issues efficiently, improving problem resolution.
- Enhanced an existing POS system with Flutter, Kotlin, and PHP, adding features such as improved receipt formatting, second-screen logo display, dynamic order pricing and discounts, and Stripe payment integration, resulting in better usability and faster transaction processing.
