

Muhammad Izmir Farhan Bin Kamal

Full-Stack Developer

Summary

Hello I'm Izmir Farhan Bachelor's Degree in Computer Science Motivated graduate eager to learn and grow as a programmer, with hands-on experience in automation, web development, and POS systems. Passionate about building practical solutions and contributing to dynamic tech projects.

Experience

DG Sailor Sdh Bhd

Mar 2025 - March 2026

- Developed an automated location finder using Google Maps API, Google Sheets, and JavaScript/HTML to identify potential client restaurants, enabling real-time appointment updates and streamlining prospecting workflows.
- Built FoodieTechBot in Python with Pandas to automate menu data entry, eliminating manual work and reducing errors across company operations.
- Created an issue tracking system using Node.js, React.js, JavaScript, HTML, and CSS, allowing management to monitor, review, and reference technical issues efficiently, improving problem resolution.
- Enhanced an existing POS system with Flutter, Kotlin, and PHP, adding features such as improved receipt formatting, second-screen logo display, dynamic order pricing and discounts, and Stripe payment integration, resulting in better usability and faster transaction processing.

Skills

Programming language:

Python, Javascript, Kotlin, Dart, HTML, CSS and SQL

Framework:

Django, Flutter, [Node.js](#), React.js, PostgreSQL, GoogleSheet_AppScript and Git

Libraries:

Pandas, PythonWright, Numpy, Scikit-Learn and TKinter

Languages

- Bahasa Melayu
(Native)
- English
(Fluent)
- Bahasa Indonesia
(Conversational)
- Spanish
(Basic)

EDUCATION

Bachelor in Computer Science, Management and Science University (MSU), Shah Alam, Selangor

2022-2025

Foundation In Information Technology, Management and Science University (MSU), Shah Alam, Selangor

2021-2022

Muhammad Izmir Farhan Bin Kamal

IT Technical Support

Summary

Hello I'm Izmir Farhan Bachelor's Degree in Computer Science Motivated graduate eager to learn and grow as a programmer, with hands-on experience in automation, web development, and POS systems. Passionate about building practical solutions and contributing to dynamic tech projects.

Experience

DG Sailor Sdh Bhd

Mar 2025 - March 2026

- Configured and deployed POS systems at client sites by assessing network environments, including router setup, connectivity checks, and ensuring stable internet performance for system operation.
- Performed on-site network diagnostics and troubleshooting, identifying and resolving connectivity and system issues to minimize downtime.
- Provided end-user training to clients and staff, clearly explaining system features, functions, and best practices to ensure smooth daily operations.
- Troubleshoot POS system errors and performed system reconfiguration when necessary; escalated complex technical issues to the engineering team for further resolution.
- Acted as a liaison between clients and the technical team, effectively communicating issues, feedback, and system improvement requests.
- Collaborated with international technical teams to report bugs, track issues, and support continuous system enhancements.
- Supported and maintained POS system improvements, including features such as receipt formatting, pricing logic, discount handling, and payment integrations.
