

Muhammad Izmir Farhan Bin Kamal

• Selangor, Malaysia mhdizmrfarhan@gmail.com • +601116231651

Education

Management and Science University (MSU)

Shah Alam, Selangor

- Foundation, Foundation In Information Technology
- Degree, Bachelor in Computer Science
- [Irex Silver Medal – FYP Presentation Award](#)

Greenview Islamic International School

Shah Alam,

Selangor

- [Digital Campus 2017 Master category – Top Coder](#)

Experience

DG Sailor Sdh Bhd.

Shah

Alam,

Selangor

(Full-Stack Developer)

March 2025 –

March 2026

- Built automated systems to detect and resolve technical issues, reducing downtime and improving daily operations.
- Developed a lead-generation and marketing automation system using Google Apps Script and Google Places API, reducing manual prospecting work.
- Created an integrated Google Sheets / Excel automation to send emails, schedule calendars, book appointments, and manage client data.
- Integrated Twilio to automatically send messages and quotations, improving response time and client communication.
- Improve on the current POS system by adding a 2nd screen display which shows price, discount, SST and restaurant logo not only that but also integrating a payment gateway with stripe for both qr and mastercard for fast and efficient payment process.
- Built automation bots (Python, Playwright) to handle repetitive data entry, reducing manual labor and human error.
- Worked with JavaScript, Node.js, React, HTML, CSS, Flutter, Kotlin, and Firebase across frontend, backend, and hardware communication.
- Assisted with IoT device setup and troubleshooting in real-world environments.
- Provided professional client support, managing calls, scheduling, and technical assistance.

Leadership & Activities

(IT Technical Support)

Shah
Alam,
Selangor
March 2025 –
March 2026

- Configured and deployed POS systems at client sites by setting up and verifying network connectivity, ensuring stable system performance and minimizing installation issues.
- Diagnosed and resolved network and system-related problems (e.g., router configuration, connectivity issues), reducing system downtime and improving reliability.
- Provided hands-on training to clients and staff on system usage, improving user adoption and reducing operational errors.
- Performed troubleshooting and system reconfiguration for POS and related hardware/software issues; escalated complex cases to the technical team when necessary.
- Supported IoT and POS hardware setup, ensuring proper integration and functionality in real-world environments.
- Monitored and resolved technical issues efficiently through structured problem-solving and support workflows, improving day-to-day operations.
- Communicated directly with clients to handle technical inquiries, schedule support, and provide timely updates, enhancing customer satisfaction.
- Acted as a bridge between clients and internal technical teams by documenting issues, reporting bugs, and following up on resolutions.
- Assisted in maintaining and improving system performance by identifying recurring issues and suggesting practical enhancements.
